

## Knowledge Unlocked.

You've invested in documentation. Now people can actually get answers from it.

### ⚠ The Problem

- ✗ Customers and staff **can't get answers** when experts are unavailable
- ✗ Critical knowledge is spread across countless documents, and getting answers means waiting for the experts who know where to look.
- ✗ Traditional search returns too many results, requires exact keywords
- ✗ Skilled staff are pulled away from high-value work to answer **routine questions**

### ✓ The Docora Solution

- ✓ Ask questions in plain English, get **answers** - not search results
- ✓ AI responds based **only on your approved documents** — not public internet content
- ✓ Answers grounded in your documents, with **optional source citations**
- ✓ **24/7 access** to organizational knowledge without interrupting colleagues

### How It Works

#### 1. Upload Documents

PDFs, Word, PowerPoint, web pages

#### 2. Ask Questions

Natural language, no special syntax

#### 3. Get Immediate Answers

Synthesized from the knowledge previously trapped in your documents

### TRUST & CONTROL

#### Enterprise Security

Role-based access, audit logging, compliance ready

#### Analytics

Usage tracking, query insights, full visibility into all queries and responses

### ADOPTION & SCALE

#### Multi-Collection

Organize by team or topic with proper access controls

#### Mobile Access

QR code login, chat optimized for phones

### FUTURE-PROOFING

#### All Major AI Providers

OpenAI, Claude, Ollama - no vendor lock-in

#### Auto-Update

Web content automatically refreshes on schedule

**Perfect for teams that answer the same questions over and over — and shouldn't have to.**
